THE
Harmonic HealthCare®
SERENITY LISTENING SYSTEM

GroupHealth

**Musical programming designed by
Don Campbell
Author of
'Healing at the Speed of Sound' and twenty other titles.**

The Serenity Listening System® is the latest introduction by Aesthetic Audio Systems in their successful ambient audio programs. Designed to create individual or group serenity zones in waiting rooms, organizations can now easily offer the serenity experience of designed harmonic music for its patients, visitors and customers with this 'stand alone' system.

"After 3 years of research, Harmonic Healthcare® is available without costly installation and penetration into walls and ceilings."

Utilizing the most recent technology and their evidence based musical programming, The Serenity Listening System® is a self contained system, housed in it's own beautifully constructed cabinet. The size of a waiting room chair, it is easy to install, moveable and requires no special infrastructure; no cutting speakers into ceilings, running wires or other costly installation expenses. The system broadcasts it's music out of the cabinet and also broadcasts

wirelessly to its secondary speaker which can be placed up to 50 feet away in the same or other wait space.

Your patients and customers can choose to have a musical relaxation experience, watch television or enjoy conversations with little or no hustle and bustle of activity.

"Patients and visitors who have experienced Harmonic Healthcare® in waiting spaces have reported clearer thinking, less stress and a feeling of renewal."
